QT-6000

CASIO

get in touch with the future of hospitality

Casio's QT-6000 has a sturdy and ergonomic design with advanced networking for easy wireless installation, shared check tracking and shared printer functionality.

QT-6000

Smart Touch

The QT-6000 has been designed primarily for the hospitality market. The large user-friendly touch screen enables quick identification and selection of items by touching the corresponding graphics on the screen. The operator can display these in a variety of sizes and can also customise the screen to complement their corporate colour scheme.

The QT-6000 is equipped with standard functions ideal for use in restaurants, cafés and bars such as shared check tracking and shared printing. Its features include a small footprint so it can be sited almost anywhere.

Communication between terminals are made using Ethernet, which can be configured easily and accurately with the automatic ID setting function.

An optional high-speed radio frequency wireless communication function is also available to offer solutions in cases where it is difficult to install wired Ethernet networks.

Magnetic card reader (optional)

A magnetic card reader is available for customer identification and future use.
